-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 6-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Brambilla, et al. (6,758,495).

Brambilla discloses a method for triggering a restraining device in a vehicle comprising determining a value of at least one parameter relating to an impact with an object based on data provided from a pre-crash sensor system; and adjusting an intensity of the triggering of the restraining device as a function of the value of the at least one parameter (see col. 5, lines 41-60). At least one parameter includes at least one of an offset of an expected point of impact from a longitudinal axis of the vehicle, an expected angle of impact with an object, an expected speed of impact, and an expected time of impact (see col. 5, lines 44-51). The intensity of the triggering is reduced when an object is periodically detected by the pre-crash sensor system over a predetermined period of time (see col. 4, lines 40-43). Brambilla discloses a device

for triggering a restraining device in a vehicle having a pre-crash sensor system, the device comprising a control unit (CU) configured to determine at least one parameter based on data from the precrash sensor system, the control unit configured to transmit at least one output signal for triggering the restraining device as a function of the at least one parameter; and an arrangement for adjusting an intensity of the triggering of the restraining device coupled to the control unit, the arrangement adjusting the intensity as function of the at least one output signal. The restraining device is a reversible restraining device (see col. 5, line 44-col. 6, line 2).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
